# HUB Drive Safe App

Keep your drivers safe and protected on the road.

## Drive safely. Get personalized feedback.

HUB Drive Safe enables your drivers to visualize and improve their driving and avoid behaviors that can contribute to accidents. The app monitors and scores driver behavior and measures driving events per trip. Predictive analytics help your fleet managers improve dispatch efficiency and reduce insurance costs. Should a road incident occur, HUB Drive Safe produces and sends the claims incident report so you don't have to. To access all of these benefits, the only hardware you need is a smart phone.

## Accidents happen. Stay protected.

HUB Drive Safe uses smart phone sensors to measure driving behavior from trip origin to destination and scores your drivers against other drivers using the app. In the event of an accident, HUB Drive Safe's collision detection enables you or your drivers to immediately notify emergency contacts and initiate an insurance claim.
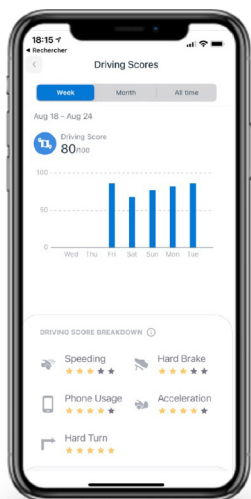

## Safety Features Designed to Keep Your Drivers Safe

### Driver Profile

**Improve driving behavior with tips based on performance tracked in the app.**

○ Driving score represents your drivers' overall performance.

○ Trips are automatically tracked including distance, duration, start and end, and detailed trip trails.

○ Trip trails show events that are related to overall driver score including:

- Driving Metadata
- Total Miles Driven
- Total Trips Taken
- Monthly, Weekly filtering
- All time Driving Stats

## Fleet Safety

**Get a high-level view of your fleet's performance with a fleet score**

○ View, in detail, each fleet drivers' driving behaviors and scores.

○ Reduce the likelihood of collisions through consistent driver feedback and coaching. Fleet managers can also have access to their drivers' locations.

○ Quickly identify excellent, fair, and risky drivers and take immediate precautionary measures including retraining drivers.

○ View the scoring history to ensure consistent improvements.

## Collision Detection

**Automatically detect collisions and alert the fleet manager, notify an emergency contact or trigger a workflow (e.g., First Notice of Loss).**
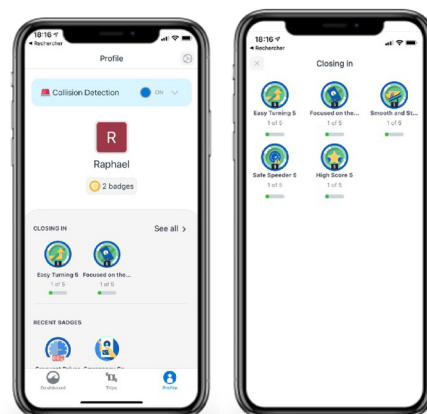

○ Provides high accuracy detection rate at low speeds.

○ Speed up insurance claims process with automatic data upload on collision event.

○ Provide driver centric value-add helping drivers during a stressful time.

## Rewards and Gamification

**Encourage consistent improvements in driving behavior with positive reinforcements.**

○ Stimulate healthy competition amongst drivers with weekly, monthly, and all-time leaderboards.

○ Boost retention and satisfaction by offering frequent rewards for safer driving behaviors.

○ Earn badges for good driving through drive gamification.

The HUB Drive Safe App is available as a standalone solution. It also works with HUB Drive Online, our transportation platform where your app data is integrated with driver training and coaching programs. HUB Drive Online helps you manage your people, partners and insurance policies faster and easier.
